

Does your business need survey?...

In today's world, gathering information is critical to provide improving services to customers and to meet their needs. This is best achieved by directly asking customers for opinions and feedback. Surveys provide the most direct mechanism to receive that information.

Uses include:

- > Feedback of current services / products
- > Test product acceptance
- > Test marketing strategies
- > Custom forms filling by customers

Create web-based surveys in 3 easy steps...

Create

Simply create survey name, Headings, Questions and possible answers. Also allows you to insert sections and page breaks.

Send

You can send the survey via the provided link, or emails. It allows you to import any email list and also can send reminders.
